01 Executive Overview

لمحة تنفيذية

An established Egyptian engineering consultancy with academic foundations, a documented project record and in-house testing, serving clients in Egypt and engineering partners in the GCC.

Al Saher Engineering Consultancy was founded in 1996 by Prof. Dr. Saher Rafaat El-Khoraiby, former Dean of the Faculty of Engineering, Tanta University, and Prof. Dr. Bakenaz Zeidan. The office has practised continuously since then, delivering geotechnical, structural, water-infrastructure, testing and construction-support services.

Today, Al Saher combines that record with a soil and concrete laboratory, fifteen years as a design review office for the Egyptian Decennial Liability Insurance Pool and current research in sustainable materials, and supports GCC consultants and contractors as a remote engineering partner, alongside the local engineer of record.

1996	30	140+	15+	15
Established	Years of continuous practice	Projects in our record	Egyptian governorates served	Years as a design review office

WHAT THIS MEANS FOR OUR PARTNERS

Developers & investors

Lower technical risk through foundation and structural design grounded in site investigation and test data, with calculations checked by the consultant.

Consultants & contractors

Soil reports, testing, dewatering and shoring design, and structural design to the Egyptian Code; other codes coordinated with the local engineer of record. Arabic and English documentation.

Authorities & institutions

Syndicate-registered consultants, 2005–2021 experience as a design review office of the Egyptian Decennial Liability Insurance Pool, and public-sector project experience.

SERVICE DELIVERY MODES

- Remote engineering support
- On-site consultancy (upon request)
- Hybrid project partnerships
- Engineering training & technical support

MARKET FOCUS

- Contractors & EPC companies, Saudi Arabia
- Real estate developers, UAE
- Contractors & public owners, Egypt
- Water & industrial sector clients

02 Leadership Message

رسالة القيادة

> “We do not just deliver drawings. We deliver engineering confidence.

A WORD FROM THE GENERAL DIRECTOR

Written for partners, clients and project organisations considering Al Saher for their next engagement.

Dear Partner,

Al Saher Engineering Consultancy was founded in 1996 by Prof. Dr. Saher Rafaat El-Khoraiby and Prof. Dr. Bakenaz Zeidan on a single enduring principle: engineering integrity above all else. What began as a geotechnical and structural consultancy rooted in academic excellence has grown into a practice serving contractors, owners and public clients across Egypt.

That principle has not changed. What has changed is the toolkit: our team combines decades of field experience with current research in structural health monitoring, sustainable construction materials and the repair of concrete structures.

This is why we now offer Al Saher’s engineering depth to consultants and contractors in the GCC as a remote engineering partner: technically rigorous, working alongside the local engineer of record, and accountable for every calculation we issue.

We do not just deliver drawings; we deliver engineering confidence. Every project we undertake is a commitment to accuracy, safety and long-term client success.

Dr. Raghda Saher Rafaat El-Khoraiby
General Director, Al Saher Engineering Consultancy

Accuracy

Calculations checked by the consultant before drawings are approved for construction.

Safety

Design decisions grounded in site investigation and laboratory data, not assumptions.

Long-term client success

Structures specified with durability and maintenance in view, not only first cost.

03 Who We Are

من نحن

An academic foundation, proven in the field.

Al Saher Engineering Consultancy was born from a tradition of academic rigour and engineering integrity. Its co-founders, Prof. Dr. Saher Rafaat El-Khoraiby, former Dean of the Faculty of Engineering at Tanta University, and Prof. Dr. Bakenaz Zeidan, Professor of Water Resources & Dam Engineering, established the office in 1996 as a practice where technical excellence and professional ethics were non-negotiable.

Over three decades the office has served clients in residential, commercial, industrial, healthcare, educational and water-infrastructure sectors, with projects across more than 15 governorates, from Dakahlia to Matrouh, Assiut, Minya and Port Said. Its leadership now pairs this legacy with research in sustainable materials and digital engineering.

COMPANY TIMELINE

1996	Founded by Prof. Dr. Saher Rafaat El-Khoraiby and Prof. Dr. Bakenaz Zeidan. Initial focus on geotechnical and structural engineering in Dakahlia Governorate.
2000s	Expansion into water and wastewater infrastructure, providing structural and geotechnical engineering for projects in multiple governorates.
2005	Design review office for the Egyptian Decennial Liability Insurance Pool, from 2005 to January 2021.
2006	Dr. Raghda Saher Rafaat El-Khoraiby joins, bringing structural engineering expertise and initiating the firm’s transition into digital engineering practice.
2021	After the passing of Prof. Dr. Saher El-Khoraiby in 2020, Prof. Dr. Bakenaz Zeidan becomes CEO and Dr. Raghda General Director.
2023	Dr. Raghda completes doctoral research on the repair of pre-cracked UHPC beams exposed to corrosion, reinforcing the office’s technical depth.

INSTITUTIONAL FOUNDATIONS

Co-founded by a Dean of Engineering
Faculty of Engineering, Tanta University

Continuous practice since 1996
Syndicate-registered consultants

Review office, decennial pool
2005 to January 2021

Second-generation leadership
General Director since 2021

04 Leadership

القيادة

Professorial credentials and syndicate-registered consultants, from the office's founding to its current leadership.

In memoriam (2020)

Prof. Dr. Saher Rafaat El-Khoraiby

Co-founder

Consultant engineer in foundation design & soil mechanics

Syndicate certificate no. 1/2167

Former Dean of the Faculty of Engineering, Tanta University, and an authority in soil mechanics, foundation design and geotechnical engineering.

He co-founded Al Saher Engineering Consultancy in 1996 on an uncompromising culture of engineering integrity and professional ethics. His legacy continues to define the office's standards, values and technical practice.

Geotechnical engineering | Foundation design | Soil mechanics

Prof. Dr. Bakenaz Abdel Azim Zeidan

Co-founder; Chief Executive Officer (since 2021)

Consultant engineer in concrete structures design; Emeritus Professor of Water Resources & Dam Engineering

Syndicate certificate no. 1/2671

Ph.D. and M.Sc., IIT Bombay, India; B.Sc., Mansoura University. Emeritus Professor, Tanta University; former Head of the Department of Irrigation & Hydraulics; visiting scholar, UC Berkeley (2015–2016).

UAE experience: dam-engineering and inspection training for engineers of the UAE Ministry of Energy, and hydro-meteorological studies for projects in the Gulf, delivered through Scientific Business Solutions (SBS), UAE.

Water resources | Hydraulics | Dam engineering | Concrete engineering | UAE experience

Dr. Raghda Saher Rafaat El-Khoraiby

General Director (since 2021)

Assistant Professor, Civil Engineering, Delta Higher Institute for Engineering & Technology

AI Ambassador, NTI & MCIT (2026)
Carbon Footprint Ambassador, GOEIC (2026)
Ph.D. Structural Engineering, Tanta University (2023)

Second-generation engineering leader, with the office since 2006. Academic Faculty Member, Institute for Sustainable Infrastructure (ISI), Washington D.C.

Leads the firm's engineering design practice, digital transformation and GCC market strategy.

Structural engineering | Rehabilitation & strengthening | AI in civil engineering | Structural health monitoring | Sustainable infrastructure | Green concrete | Carbon footprint assessment | Digital engineering

Legal & registration

- Syndicate-registered consultants
- Prof. Dr. Bakenaz Zeidan: consultant engineer in concrete structures design (certificate no. 1/2671)

Past role

- Review office, Egyptian Decennial Liability Insurance Pool, 2005 to January 2021
- Concluded in January 2021

Offices

- Headquarters: 3 Montaser Street, Al-Sawsan Tower, Ground Floor, Mansoura, Dakahlia, Egypt
- Market focus: Egypt, with remote engineering support for GCC partners (no GCC offices)

Sectors served

- Residential towers & villas
- Commercial & mixed-use
- Industrial facilities
- Hospitals & healthcare
- Educational buildings
- Water & wastewater
- Bridges & irrigation structures
- Mosques & institutional

LOCATIONS IN OUR PROJECT RECORD

Dakahlia (Mansoura, Mit Ghamr, Dekernes, El Matareya), Port Said, Kafr El-Sheikh, Tanta, Matrouh, Assiut and Minya, part of a footprint spanning 15+ governorates.

06 Vision, Mission & Values

الرؤية والرسالة والقيم

OUR VISION رؤيتنا

To be a trusted engineering partner for contractors, owners and consultants in Egypt and the region, delivering practical, durable solutions that serve the communities they are built for.

OUR MISSION رسالتنا

To provide technically sound, client-focused engineering consultancy services that combine three decades of practice with current research in materials and digital engineering.

CORE VALUES قيمنا

Engineering integrity

We do not compromise on accuracy, safety or professional ethics, in any project, for any client.

Technical excellence

Academic rigour and field experience combine in every design we deliver.

Sustainability

We specify durable materials and support research in green concrete and sustainable infrastructure.

Client partnership

We are invested in the success of every project as if it were our own.

Innovation

We apply research, from structural health monitoring to new repair materials, where it makes engineering better.

Quality assurance

Every design is checked by the consultant before it is approved.

07 Our Capabilities

قدراتنا الهندسية

Six service lines in one office, so geotechnical data, structural design, water infrastructure and site quality control stay connected.

01 Structural Engineering

الهندسة الإنشائية

Reinforced concrete structures, from residential towers of up to basement, ground and 11 floors to public, healthcare and industrial buildings.

02 Geotechnical & Foundation Engineering

الهندسة الجيوتقنية والأساسات

The firm's founding discipline. Foundation decisions based on investigation and test data, supported by in-house laboratory and field testing.

03 Water Resources & Hydraulic Engineering

الموارد المائية والهندسة الهيدروليكية

Structural and geotechnical engineering for water and wastewater projects, irrigation structures and bridges, supported by our CEO's hydraulic and hydrological expertise.

04 Inspection & Rehabilitation

إعادة التأهيل الإنشائي

Condition surveys and technical reports for existing buildings, concrete assessment, and repair and strengthening design.

05 Integrated Packages

الأعمال المتكاملة

Soil investigation, architectural and structural design and tender documents, prepared together for public buildings.

06 Construction Support & QA/QC

دعم التنفيذ وضبط الجودة

Supervision, material testing and inspection that carry design intent through to site.

APPLIED ACROSS

Residential towers & villas, commercial & mixed-use, industrial, healthcare, educational, water & wastewater, bridges & irrigation, and mosques & institutional buildings.

08 Engineering Services

نطاق الخدمات الهندسية

Full scope of services by discipline, for procurement, engineering and technical review teams.

01 Structural Engineering

- Reinforced concrete structures
- Public, healthcare & educational buildings
- Residential towers up to B+G+11
- Industrial & warehouse structures
- Structural analysis & detailed design
- Technical verification of existing designs
- Design review (insurance-pool review office, 2005–2021)

02 Geotechnical & Foundation Engineering

- Soil investigation & borehole interpretation
- Shallow & deep foundation design
- Pile design & pile load tests
- Plate loading tests
- Settlement & bearing capacity analysis
- Dewatering & excavation-support design
- Dewatering & well tests

03 Water Resources & Hydraulic Engineering

- Structural design for treatment works
- Sewer projects: dewatering, shoring & jacking pits
- Lift station structures
- Elevated water tank design (200–1,000 m^3)
- Irrigation structures & canal works
- Weirs, culverts & hydraulic structures
- Hydrological modelling & flood assessment

04 Inspection & Rehabilitation

- Structural assessment & condition survey
- Concrete quality assessment (cores, NDT)
- Repair & strengthening design
- Safety of adjacent buildings during excavation
- Settlement & cracking investigations
- Tilt assessment of elevated tanks
- Technical reports for owners & authorities

05 Integrated Packages

- Architectural design for public buildings
- Structural design
- Soil investigation reports
- Conditions & specifications booklets
- Project time schedules
- Health units, schools & administrative buildings
- Tender document preparation

06 Construction Support & QA/QC

- Construction supervision
- Quality control: concrete & steel testing
- Non-destructive testing (NDT)
- Project scheduling (Primavera)
- Environmental impact assessment
- Technical inspection reports
- Engineering training & capacity building

Design basis. Services are delivered to the Egyptian Code (ECP). Other codes on request, coordinated with the locally licensed engineer of record.

Documentation. Design deliverables are available in Arabic and English, for government authorities and private clients alike.

09 Codes, Software & Testing

الأكواد والبرمجيات والاختبارات

Design to the Egyptian Code, an established analysis toolset and field and laboratory testing: the working basis for integrating with consultant and contractor teams.

DESIGN CODES & STANDARDS

CODE	ISSUED BY / APPLICATION	SCOPE	AVAILABILITY
ECP	Egyptian Code of Practice	All structural disciplines	Standard
SBC 301 / 304 / 306	Saudi Building Code	Loads; concrete structures; steel structures	On request
UAE Building Code	Dubai / Abu Dhabi municipalities	Building design to local authority requirements	On request
ACI 318	American Concrete Institute	Reinforced concrete structures	On request
AISC	American Institute of Steel Construction	Steel structures	On request
EC2 / EC3 / EC7	Eurocode	Concrete, steel, geotechnical design	On request

ENGINEERING SOFTWARE

Structural analysis	SAP2000
Finite-element analysis	Abaqus
CAD & documentation	AutoCAD
Project management	Primavera P6
Research & analysis	Python, SPSS

DIGITAL & RESEARCH

- AI tools in engineering research
- Smart crack-monitoring prototypes (research)
- Carbon footprint training (GOEIC, 2026)
- Structural Health Monitoring (SHM), research application

LABORATORY & TESTING

Geotechnical and material data generated in-house, supporting faster and better-informed foundation and quality decisions.

- In-house soil & concrete laboratory
- Compaction & plate load tests
- Pile load tests
- Concrete compression & NDT testing
- Steel tensile testing
- Water quality analysis for concrete
- Dewatering & well tests

10 Quality Assurance

ضمان الجودة والحوكمة الفنية

Every design package, from preliminary calculations to issued-for-construction drawings, passes through a defined review sequence before it reaches the client.

TECHNICAL GOVERNANCE: ENGINEERING REVIEW WORKFLOW

Stage 1	Stage 2	Stage 3	Stage 4	Stage 5	Stage 6
Concept & design brief	**Preliminary design & calculation**	**Internal technical review**	**Client submission**	**Final design & IFC**	**Construction support**
Brief confirmation; design basis and applicable codes agreed.	Design to the applicable code.	Calculation checking by the consultant; coordination review between disciplines.	Client review cycle with structured comment resolution.	Final check before approval for construction.	Technical queries answered and site issues resolved against design intent.

Document control: version tracking on all deliverables, at every stage

QA/QC STANDARDS

Code compliance	Design to the applicable code
Consultant checking	Calculation checking by the consultant
Final check	Final check before approval for construction
Interdisciplinary coordination	Drawing coordination review: structural / architectural / MEP
Comment resolution	Client review cycle with structured comment resolution
Document control	Version tracking on all deliverables

INSTITUTIONAL SAFEGUARDS

- Syndicate-registered consultants
- Design review office for the Egyptian Decennial Liability Insurance Pool, 2005 to January 2021
- Soil & concrete laboratory and field testing
- Arabic & English technical documentation

> "Every design is reviewed before it leaves our office, because engineering errors cost lives, not just money."

11 Sustainability & Innovation

الاستدامة والابتكار

Sustainability as an engineering discipline, grounded in research: durable materials, careful specification and longer service life for existing structures.

Our General Director, Dr. Raghda El-Khoraiby, is a GOEIC Carbon Footprint Ambassador (2026) and holds a Ph.D. in structural engineering on the repair of UHPC beams; her research covers green concrete, UHPC and sustainable structural materials. This research informs how we specify materials and assess repair options.

SUSTAINABILITY: SERVICES AND RESEARCH ACROSS THE ASSET LIFECYCLE

Materials ›	Design ›	Construction ›	Operation
Concrete mix design; research in green concrete, UHPC and low-carbon binders	Durability-focused structural design and specification	Environmental impact assessment (EIA); carbon footprint awareness (GOEIC training)	Structural health monitoring, research application; rehabilitation to extend service life

Services and research

- Concrete mix design
- Environmental impact assessment (EIA)
- Repair & strengthening design for existing structures
- Research: green concrete & low-carbon binders
- Research: structural health monitoring
- Research: repair of UHPC beams (TRM & NSM)

Research & professional credentials

- Doctoral research: repair of pre-cracked UHPC beams exposed to corrosion (TRM and NSM)
- Published research: Ain Shams Engineering Journal (2023), pre-cracked UHPC beams
- Academic Faculty Member, Institute for Sustainable Infrastructure (ISI), Washington D.C. (2026)
- AI Ambassador, NTI & MCIT (2026)
- Carbon Footprint Ambassador, GOEIC & ESE (2026)
- Ph.D. Structural Engineering, Tanta University (2023)

Why it matters

Research-informed material and repair decisions, applied with care to each project.

12 Why Al Saher

لماذا آل ساهر

The client value proposition: ten reasons partners work with Al Saher, grounded in the office's record.

Engineering legacy

Co-founded in 1996 by a former Dean of the Faculty of Engineering, Tanta University, and in continuous practice since.

Field experience

140+ projects in our record across Egypt: structural design, soil investigation, testing, water infrastructure, bridges and construction supervision.

Design review experience

Fifteen years (2005–2021) as a design review office for the Egyptian Decennial Liability Insurance Pool.

Contractor support

Dewatering, excavation-support and construction-method designs that let contractors work safely.

Quality assurance

Six-step review with consultant calculation checking and a final check before approval for construction.

Academic depth

Leadership with professorial credentials in structural, geotechnical and water engineering, and current research in UHPC repair and sustainable materials.

Multidisciplinary capability

Geotechnical, testing, structural, water, inspection and construction-support services, coordinated within one office.

Sustainability

A GOEIC Carbon Footprint Ambassador on the leadership team, and research in green concrete and durable materials.

Field & laboratory testing

Soil and concrete laboratory and field testing: compaction, plate load, pile load, concrete and steel tests.

GCC readiness

UAE experience of our CEO, Arabic and English documentation as standard, and a clear engineer-of-record model with local partners.

13 Selected Project Experience

خبرات المشاريع المختارة

A selection from our project record since 1996, organised by sector. Al Saher's role is stated for each project; scope details are available on request.

Public-sector water programmes

Since the 2000s, the office has provided structural and geotechnical engineering for water and wastewater projects across multiple governorates.

Geographic reach

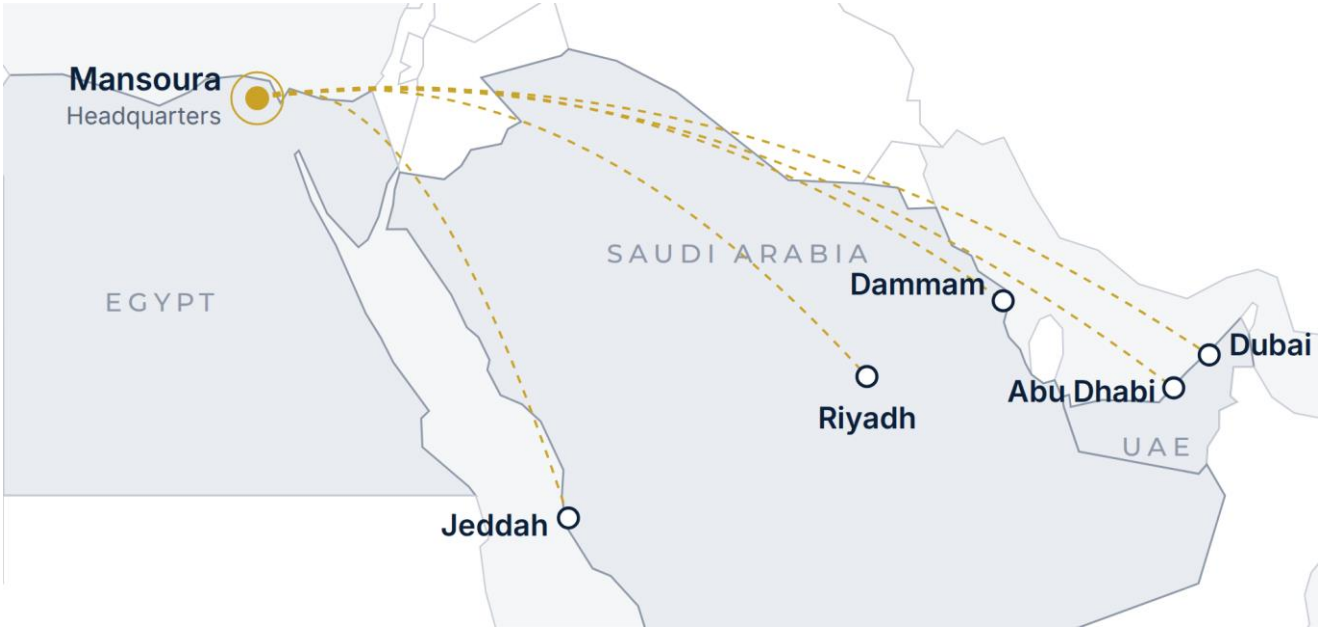

Projects across 15+ Egyptian governorates, from Dakahlia to Matrouh, Assiut, Minya and Port Said.

Scope details available on request | Al Saher's role, location and project type

14 Regional Partnership Model

نموذج الشراكة الإقليمية

Engineering delivered from Egypt for GCC projects: a remote engineering partner for consultancies and contractors, alongside the local engineer of record.

● Headquarters ○ Market focus for remote design support (not office locations)

CURRENT

Headquarters

3 Montaser Street, Al-Sawsan Tower, Mansoura, Egypt. Engineering delivery, consultant review, laboratory testing and document control.

IN DEVELOPMENT

Regional business development

Saudi Arabia & UAE: business development for remote engineering support. No offices or licences in the GCC at present.

AVAILABLE NOW

GCC design support

Remote engineering, coordination and technical support for consultants, contractors and developers; site visits on request.

WHY PARTNERS CHOOSE AL SAHER

Design review experience
Fifteen years reviewing structural designs for the Egyptian Decennial Liability Insurance Pool.

Arabic & English documentation
Deliverables available in both languages, meeting the needs of authorities and private clients.

Geotechnical capability
In-house laboratory and field testing: foundation decisions based on real data, not assumptions.

Engineer-of-record model
We work under the locally licensed consultant, who remains engineer of record.

Academic leadership
Professors of structural, geotechnical and water engineering lead the work.

Long-term reliability
Continuous practice since 1996.

HOW WE ENGAGE IN THE GCC

Al Saher works alongside the locally licensed consultant or contractor, who remains engineer of record where local registration or authority submission is required. We provide the engineering depth; our partner provides the local licence and site presence.

Relevant to projects in Riyadh, Jeddah, Dammam and the Eastern Province, Abu Dhabi and Dubai.

15 Partnership Opportunities

فرص الشراكة

Flexible collaboration models for the organisations that shape and deliver projects.

WHO WE WORK WITH

PARTNER	WHAT AL SAHER PROVIDES	TYPICAL MODEL
Real estate developers	Structural & geotechnical design, soil investigation, testing	Specialist engineering consultant
Institutional investors & family offices	Technical assessment, condition surveys, inspection reports	Technical support partner
Main contractors	Dewatering & shoring design, technical queries, QC testing	Engineering support partner
EPC companies	Civil, structural and water-infrastructure design; hydraulic structures	Engineering support partner
Engineering consultancies	Overflow design, calculation checking, design review	Structural design partner
Architectural firms	Structural design for architectural schemes; coordination review	Structural design partner
MEP consultants	Structural / architectural / MEP drawing coordination	Technical support partner
Infrastructure companies	Pumping stations, networks, tanks, weirs, culverts, bridges	Specialist engineering consultant
Government & institutional clients	Condition surveys, EIA, inspection reports	Rehabilitation consultant; QA/QC support
Universities & research institutions	SHM, UHPC, green concrete and AI research; training	Research & innovation; capacity building

COLLABORATION MODELS

Engineering support partner
Remote structural and geotechnical engineering under the partner's programme.

Specialist engineering consultant
Discipline lead for structural, geotechnical or water scopes.

Structural design partner
Structural design within a larger consultant team.

Technical support partner
Reviews, technical verification and query resolution.

Geotechnical support
Investigation interpretation, foundation design, plate and pile load testing.

Rehabilitation consultant
Assessment and strengthening of existing structures.

QA/QC support
Supervision, material testing, NDT and inspection reports.

Research & innovation
Applied research in SHM, AI, UHPC and green concrete.

Training & capacity building
Engineering training programmes and technical support.

16 CONTACT & NEXT STEPS تواصل معنا

Engineering confidence from concept to construction.

We welcome the opportunity to discuss your project requirements, submit a technical proposal or arrange a consultancy meeting.
